Subject: Kicking off the next season

Date: 22 January 2013 21:04:52

Following the success of ISPRS working group V6 between 2008-12 we are pleased to announce that our activities/coordination will continue under a new ISPRS working group V5. We have various events planned for the coming years, not least involvement in both the EGU in April and IAG in Paris in August this year. I will be chairing activities, supported by Thomas Dewez, Jim Chandler, and Vladimir Knyaz. Note in this four year session we are also broadening our remit to include “bio measurement”, which includes sports and body measurement.

We are assuming that you still wish to be informed of activities via our new mailing list. If not, please contact us.

Dirk Rieke-Zapp, WG chair
