Subject: EGU 2013
Date: 10 January 2013 19:08:36

Dear list members

The deadline for submission of abstracts for EGU 2013 in Vienna commenced last night. Nonetheless, additional abstracts may still be implemented by sending an e-mail to either of the conveners of individual sessions. Session GM2.2 is directly supporting the goals of ISPRS commission V WG 5

GM2.2
High definition topography - data acquisition, modelling, interpretation
http://meetingorganizer.copernicus.org/EGU2013/session/11696

Let me know if you want to submit an abstract to GM2.2 within the next couple days.

Cheers
Dirk
